

Advice 14-2010 of the Scientific Committee on the analyses program of the FASFC: re-evaluation of the scores attributed to the severity of chemical hazards related to food safety, animal and vegetal production

This advice concerns the evaluation of the values or scores assigned to the severity of the adverse effects of chemical hazards for food safety, animal and vegetal production. These scores are used for the calculation of the number of analysis to be included in the FASFC analyses program for these hazards by application of a, on a statistical approach based, risk analysis. The Scientific Committee formulates a number of hazard specific comments.
