

Advice 02-2012 of the Scientific Committee of the FASFC on a project of royal decree on the hygienic conditions related to the direct supply by an animal keeper or by another producer of primary products, or a hunter of small quantities of some foods of animal origin to the final consumer or of wild game to the retail that delivers directly to the final consumer

The Scientific Committee is asked to evaluate a draft royal decree on a project of royal decree on the hygienic conditions related to the direct supply by an animal keeper or by another producer of primary products, or a hunter of small quantities of some foods of animal origin to the final consumer or of wild game to the retail that delivers directly to the final consumer.

The Scientific Committee formulated some remarks on the project of royal decree, and wishes to remark that guidelines for self-control (e.g. in a guidebook for self-control) for the respective sectors would be advisable to identify the risks and to precise the required approach.
