

**Advice 23-2013 of the Scientific Committee of the FASFC on the evaluation of a sectoral sampling plan regarding the cattle farming sector.**

The Scientific Committee is asked if the proposed sampling plan, designed by the cattle farming sector, can be validated and can be taken into account for the programming of the FASFC control plan.

The Scientific Committee is of the opinion that the proposed sampling plan is of good quality and accurately follows the methodology used by the FASFC to draw up its own control plan. However, the Committee has formulated some fundamental remarks in regard to the design of this sampling plan. Provided that the sampling plan is adjusted according to these remarks, it can be validated and taken into account for the programming of the FASFC control plan.
